B'H, this year is off to a great start in Bnos Bracha. We have been bonding into a cohesive group through cooperative games and exciting learning experiences. In Chumash, the girls are working hard at finding Shorashim and prefixes to enable them to translate on their own. It's always an exciting moment when they can figure out the meanings of words in the Pesukim.

In the language department, Braidy, our school puppet, is teaching us how to structure our writing carefully. The girls are writing lovely story beginnings that truly draw the reader into their story. In science, the girls voted to study mammals. First, we learned about how scientists classify all living things. We focused on the twelve classifications of mammals. Then we began researching specific mammals. The girls read books and record information. Through this research they not only learn fascinating facts, they are also brushing up on reading skills and beginning to learn the skill of writing a non-fiction book report.

This Wednesday, Bnos Bracha girls went to Kakiat Park. The girls enjoyed a nature appreciation day. We had a scavenger hunt and searched for various items found in nature. We then took a trail hike through the woods. The sky was clear, the air was crisp and a great time was had by all. Thank you to Mrs. Gelfond for joining us and helping out!
